Re: Letter of Thanks and Recommendation

16 August 2013

Dear Mr. Romano,

I am writing to express my sincere thanks for the excellent work that you and your team at NARDI Construction performed and delivered for the DPIE project for Prince George's County. **At the new Department of Permits, Inspections, and Enforcement (DPIE), NARDI Construction was able translate the vision of our A+E team from design drawings and specifications into beautiful spaces that are well constructed and were delivered in record time!** The new spaces for DPIE are handsome spaces that show pride in workmanship and attention to detail. From the built-in millwork to the drywall to the HVAC work – the project was well-crafted all around. You and your team in the field were great to work with and we appreciated the professionalism and commitment to integrity that NARDI brought to all aspects of the project.

We want to thank NARDI for delivering such excellent quality work and for being a pleasure to work with. We highly recommend NARDI Construction to other Owners, Clients, and Architects who may have an opportunity to work with NARDI. Your team's commitment to excellence is truly extraordinary in the Construction industry.

On the new DPIE Project, NARDI's "can do" spirit was evident from the very beginning when they joined the design / build team along with the Owner (the County) and with us at Grimm + Parker. Together with the Owner and the Architect, NARDI was a great team player that helped the design team establish realistic goals and priorities for this fast track delivery project. From our perspective as Architects, we could not have been as effective as we were if we had not had your input about how to meet the project schedule and how to accomplish key design objectives. At DPIE, NARDI was able to construct and deliver more than 24,000 gross square feet of space in less than 3 months! Your team's commitment to the success of the fast track schedule was key to that schedule being accomplished. We thank you for that! We appreciated your willingness to bring sub-contractors to our offices to quickly resolve important design and fabrication issues. We appreciated your willingness to give helpful advice about which products would be available through quick-ship programs and which would not. NARDI was a terrific partner in a collaborative process that resulted in our entire team achieving the Client's goals of getting new DPIE offices open and occupied by July 1st, 2013.

The real key to NARDI's success is more than just delivering high quality spaces for the Client to use and occupy. What makes NARDI very special is that they are true partners in success as they bring real value and meaningful contributions to both the design and the delivery process on a project as well as to the human relationships that are counted on to make a project a success. Thank you Lenny, and Lou, and Jim for all you do to make your projects a great success!

Sincerely,

Melanie Hennigan AIA LEED AP
